This map is a visual representation of the Zoning in Kane County. Individual Parcels must be checked in the Records Office or Land Use Authority Department to verify size and current zoning. Some parcels in Kane County may be too small to visibly show on this map.

Accuracy tolerance for all data within this map is not guaranteed. Other roads information is not intended for transportation planning. See local agency for travel planning.

This map is an official representation of approved zones only and does not represent in any way whether any individual lot or parcel is in compliance with Utah State Code, Kane County Ordinances, or any other relevant law, including but not limited to the County Subdivision Ordinance. Please note that under Utah State Code and Kane County Ordinance no building permit will issue until a lot or parcel is in compliance with both State Code and County Ordinance.
