

ADDENDUM #3

NORTH KANE COUNTY EVENTS CENTER

Regarding the bid form that has been issued for the bidding of the Site Work, Building Erection, and Building concrete for the new North Kane County Events Center, the following are clarifications addressing some questions that have been raised:

1. The notice to bidders states under section titled “Type of Bids” that “All bids are to be submitted with labor and materials listed together.” This statement applies to all the work except for the building erection. The metal building itself has already been awarded and all that is needed is the labor for the erection of the building and the installation of other items listed under the “Building Erection” heading.
2. Under the “Building Concrete Work” heading on the bid form, line item #26 refers to placement of footing / slab fill. This refers to trenching for just the footings and fill to meet the plan specifications for just the footings. Line item #27 which refers to compaction testing is for compaction of the fill under the footings only. The building pad is to be built by the site work subcontractor.
3. The “Instruction To Bidder” states in item “k. Multiple Bids” that “Bidders may not submit more than one bid”. To clarify this item, bidders may not submit more than one bid for each line item on the bid sheet, however, bidders may submit one bid for multiple items on the bid sheet if they desire.
